## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 8-9, 17-19, 29-30, and 37-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (U.S. Pat. No. 5,181,016). Lee teaches a light filtering element for a display device comprising at least one filter having a chamber with a filtering fluid 16/66, the chamber defining an optical path entering a first side (i.e. light side in fig. 3) and exiting a second side (i.e. 78 in fig. 3) opposite the first side, and a liquid motion actuator (electrodes 16/22 or 68/72) selectively configured to move the filtering fluid substantially into and out of the optical path. The fluid may be mixed with a colored dye (col. 5, lines 50-53).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22 and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee (U.S. Pat. No. 5,181,016). Lee teaches the salient features of the claimed invention except for utilizing red green and blue. It would have been obvious to one of ordinary skill in the art at the

Art Unit: 2851

time the invention was made to utilize red green and blue for the purpose of enabling a full color display. It is notoriously well known in the display arts to use a combination of red green and blue to provide a full color display.

***Allowable Subject Matter***

Claims 23, 26, and 27-28 are allowed.

Claims 2, 5, 7, 10, 12, 14, 16, 20, 34-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments with respect to claims 1, 8-9, 17-19, 22, 29-30, and 37-39 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2851

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
